

Hello!

You have purchased a digital file that is intended to be used for you to make this push stick on your CNC machine or 3d printer.

We designed and machined this push stick for use with our tools in our shop. It is made from 1/2" MDF.

Overview:

- 14" long x 2.5" wide x 1/2" thick
- Machined from a single piece of 1/2" MDF
- Designed in V-Crave Pro
- All toolpaths are cut using a 1/8" end mill
- We did not use tabs to hold the push stick as they were machined as we have a vacuum hold down table.
- You can scale up or down to meet your needs.

Thanks for your purchase!
